## ABSTRACT OF THE DISCLOSURE

A software program enables to maintain the amount of task by the operator for image processing regardless of the number of image pages.  By displaying the combined

5    overlapped image, the operator is able to visually confirm a processing area or range for a predetermined image processing.  Because of the above described features, the operator is able to easily specify the tasks such as removing , moving and inserting an image in the selected area in an assured manner without significant experience or knowledge of computer programs.
